

SevenDirect SD23 pH/Conductivity Meter

Straight to the Point

Two Results in One Go

Quick switch between single and dual mode for maximum flexibility: the common parameters pH and conductivity can be measured separately or simultaneously, e.g. in water analysis.

Intuitive to Use

Increased productivity and minimized risk of errors: with its on-screen instructions, SevenDirect™ supports operators in carrying out procedures correctly and with confidence. The automated limit checks enable quick decisions in quality control.

Precise Sensor Position

Simplified handling avoids spilling of sample: the perfectly vertical movement of the EasyPlace™ electrode arm prevents sensor damage and ensures precise positioning, also when using multiple sensors.

Efficient Documentation

Error-free transcriptions in reduced time: the EasyDirect™ pH PC software simplifies data handling by automatically transferring data from instrument to PC, printing or exporting it for further analysis.
