440	5B	40	589/5	640md	OOA	392	FP589/5	392	-	474
444	5C	42	589/3	640de	OO6	391	FP589/3	391	15	494
442	7	43	589/2	640m	OOM	389	FP589/2	389	-	-

Please note:

When comparing depth filters like filter papers and glass fiber filters it is impossible to obtain an exact equivalent. The comparison is based on papers made from the same type of raw material giving similar filtration properties. Filtration speed can differ between types with the same retention efficiency because of the thickness of the filter. Thin filters filter faster than thick filters.
